

Certified Community Behavioral Health Clinics (CCBHC)

Video URL: <https://vimeo.com/267696035>

“I’m grateful, because when I leave this world, if this program is still here, somebody will take care of my son... Without CCBHC, all the work we’ve done, all the struggles I went through would be useless. People always say, I want to help... And now you can help. This shouldn’t just be a pilot, this should be a lifetime.” – **Carm Harper, M.S., M.Ed, Spectrum Health & Human Services**

“We’re able to truly meet people where they are and meet all of their needs, not just what we’ve decided they need, but all of their needs holistically. Then baking it all into one rate so that it’s affordable and we can get the best quality staff and keep them.” – **Elizabeth Mauro, CEO, Endeavor Health Services**

“We need your support to make sure that the Certified Community Behavioral Health Clinic model is extended and expanded because it provides the level of support to behavioral health agencies that allows them to have the full range of services that are needed by the people we serve. Much like a Federally Qualified Health Center, a CCBHC is really a ‘Federally Qualified Behavioral Health Center’ in serving the most needy of our populations. The support that this program provides allows us to do it in a manner that you or I would want to have for our own cherished loved one.” – **Bruce Nisbet, CEO, Spectrum Health & Human Services**
